

CRT 36

Ride-on Trowels

The better choice for finishing concrete surfaces: CRT 36

The CRT 36, 36-inch, ride-on trowel line offers quality results, high productivity and operator comfort. One person can easily and simply raise and lower the integrated wheel set from one jack at the rear of machine allowing easy maneuverability around the job site. During troweling, the wheel kit does not block the operator's line of sight.

- Optimum maneuverability due to its balanced power-to-weight ratio.
- Sensitive, ergonomically designed twin-lever controls reduces amount of force needed to control the unit but still provides feedback from concrete conditions for better floating and high production finishing jobs.
- A unique variable clutch offers proper torque and speed range to match concrete conditions without mechanical adjustments.
- Good visibility from the front and rear lights as standard – especially on dim lit and night operations.
- Value ride-on trowel models for the cost-conscious concrete contractor. The reduced features provide a lower priced option, but still maintain the ability to meet demanding quality finishing specifications. Comes with a high capacity centrifugal clutch.

Integrated wheel set

The integrated wheel set makes changing the blades quick and easy.
